

**anti-human CD108 purified****Cat-No.: H12216**      **0.1 mg****Clone:** MEM-150**Specificity:**

CD108 antigen (JMH blood group antigen)

**Isotype subclass:** Mouse IgM**Form:**

Purified from ascites by DEAE-chromatography and precipitation methods.

**Purity:** > 95% (by SDS-PAGE)**Physical state:** Liquid**Buffer/Additives/Preservative:**

PBS containing 15 mM sodium azide (pH 7.4).

**Expiration date:**

The reagent is stable until the expiry date stated on the vial label.

**Storage conditions:** **Store at 4 °C. Do not freeze.****Application:**

Flow Cytometry

Immunoprecipitation

Western Blotting: non reducing conditions

**Warning:**

Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.

This material is offered for **research only**. Not for use in human. For in vitro use only.
