

**anti-rat TCR gamma/delta FITC-conjugated****Cat-No.: R32150F**      **1 ml****Clone:** V65**Specificity:**

This anti-rat  $\gamma/\delta$  T cell receptor monoclonal antibody detects a T cell-specific heterodimeric 48 and 50kDa cell surface protein that is expressed on greater than 90% of  $CD3^+ \alpha\beta TCR^-$  rat peripheral T lymphocytes, and identifies a dense network of dendritic cells in the epidermis as  $\gamma/\delta$  T cells. Immobilized this antibody induces a strong proliferative response in  $\gamma/\delta$  T cell cultures supplemented with either IL-2 or IL-4.

**Isotype subclass:** Mouse IgG1**Form:** Purified from Bioreactor supernatant via Protein G Chromotography. FITC- conjugated.**Physical state:** Liquid**Buffer/Additives/Preservative:** PBS containing 1 % BSA and 0.09 % sodium azide (pH 7.4).**Expiration date:** The reagent is stable until the expiry date stated on the vial label.**Storage conditions:** Store at 4 °C. Do not freeze. Avoid prolonged exposure to light.**Application:**

Flow Cytometry  
Immunohistochemical staining on frozen sections

(1994), Identification and characterization of rat  $\gamma\delta$  T-lymphocytes in peripheral lymphoic organs, small intestine, and skin with a monoclonal antibody to a constant determinant of the  $\gamma/\delta$  T cell receptor, J. Immunol. 153, 979-986

**Warning:**

Sodium azide is harmful if swallowed (R22). Keep out of reach of children (S2). Keep away from food, drink and animal feeding stuff (S13). Wear suitable protective clothing (S36). If swallowed, seek medical advice immediately and show this container or label (S46). Contact with acids liberates very toxic gas (R32). Azide compounds should be flushed with large volumes of water during disposal to avoid deposits in lead or copper plumbing where explosive conditions can develop.
